

[A] All-cause Ages ≥ 65

[B] Respiratory Ages ≥ 65

[C] Cardiovascular Ages ≥ 65

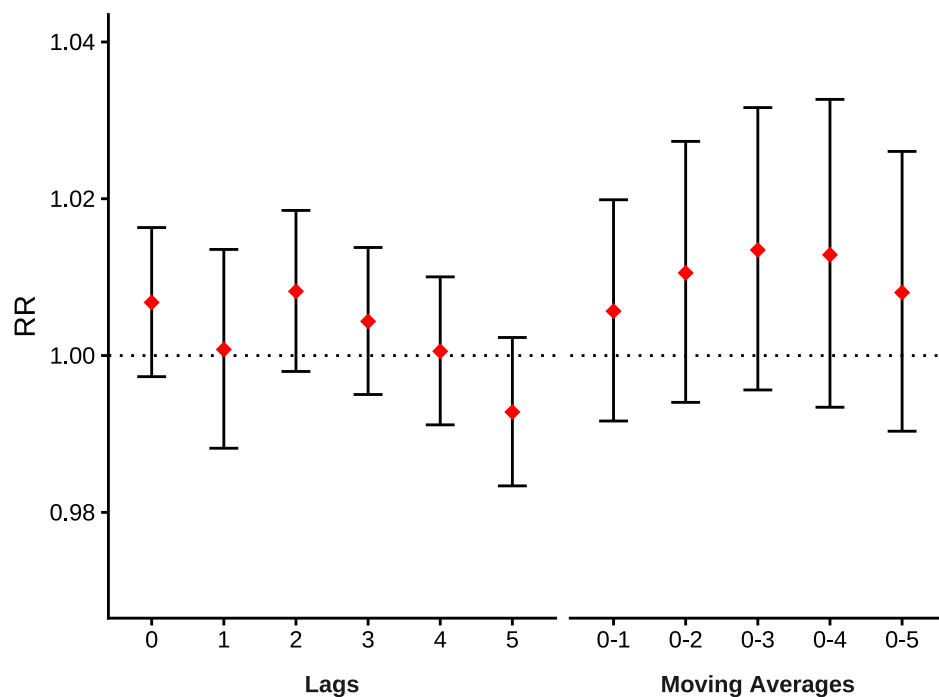

Figure S2. Association between SPM and all-cause, respiratory and cardiovascular mortality of ages 65 and above by levels of pollen cutoffs (75th, 80th, 85th) and count (25, 50, 75 grains per cm²) during the spring months (February to April) from 1989 to 2014. RR on the y-axis is defined as the relative risk per interquartile range mean (IQR) increase. Results are pooled from random-effects meta-analysis.
